

Woodford Folk Festival 2018/19 Stallholders Electrical Requirements

Please complete this form and attach to your application.

Woodford Folk Festival (WFF) Electricians carry out temporary electrical installation and distribution services on site for stallholders. All electrical equipment including your camping appliances must be listed on your application form. Any electrical equipment or leads brought into the festival by a stallholder are required to have been inspected and tagged by a licensed electrical contractor and be within a 12 month period. Please check all electrical equipment and leads before coming to the festival to avoid any delays on arrival.

This is essential for the safety of all stallholders, staff and patrons and a requirement of the Electrical Safety Regulation Act. This Act imposes severe penalties in the event of non-compliance with its provisions.

Electricians are prohibited by law from connecting any untagged appliance or allowing the use of any untagged leads within their stall or campsite. Electrical leads that are not tagged may be confiscated unless prior arrangement can be made.

No double adaptors are allowed in a commercial setting however tagged power boards are accepted.

Any faults or power failures caused due to consumer underestimation shall be charged to the stallholder.

Non-food stallholders: Payment of electrical installation services is required before entering the site. This cost will be included on your invoice.

Food stallholders: Electricians will make random electricity consumption and equipment tag checks. Food stalls will be invoiced separately from their site fee during the festival once Woodfordia Inc personnel audit their consumption. Payment will be due within 24 hours of receiving the invoice.

If you choose to bring your own temporary electrical distribution board (dizzy board) please notify us on this form so our electricians can get in touch to ensure it adheres to the new electrical standards.

What to do now?

1. Print this form.
2. Ensure all proposed equipment is drawn to scale on the plan attachment.
3. If you agree to the above conditions, please sign below.
4. Complete and attach this page to your application by the due date.
