

2018/19 Woodford Folk Festival Stallholders Plumbing Requirements

Woodfordia Inc aims to be as sustainable and environmental as we can possibly be. We continually develop resources and techniques to safely remove and reuse our waste water as effectively and efficiently as we can whilst at the same time providing clean water for people to drink. With every stallholder being mindful of this and applying systems within their stalls, we can work together to plumb the stalls to satisfy everyone's needs and protect our waterways and precious lands.

We urge you to look at your cleaning products and ensure that products on site are safe, biodegradable and do not create a hazard for anyone or the environment. Please be responsible for your stalls plumbing needs, keeping this in mind. Please do not dump your used water on the ground or in the gardens.

All food stalls must be fitted with the following in order to comply with Moreton Bay Regional Council, Australian and New Zealand Food Standards, Food Authority and QFF Standards and Procedures:

Stallholders must supply

- Double sink with taps for dish washing.
- A separate sink with taps for hand washing.
- A hot water system (minimum 10 litres) attached to both sinks.
- Waste line (50 mm PVC) to run 6m from back of stall -
- Water line able to run 6ms from food preparation area with a 20mm female line fitting to join to WFF male line.

PLEASE NOTE:

- Working sinks must be installed by the stallholder and made easily accessible for our WFF plumbers.
- A minimum 10 litres of hot water needs to be available at all times via the hot water system, (hot water urns are not deemed appropriate)
- Sinks must be used solely for the purpose installed.

The festival will supply:

- a. A connection to drinking water.
- b. A waste water disposal drain.

When you arrive we will contact the plumbers to let them know you have arrived. They will only connect waste and water once you have set up all your plumbing needs.

You are responsible for installing all plumbing within your stall and ensuring that all plumbing is in working order. If our WFF Plumber is required to do any internal plumbing you will be charged an hourly rate of \$90.00 plus any materials used.

Stallholders must be present on site to support the installation of all plumbing and gas. Stallholders must not create showers behind the stall, we ask for you to use the facilities available.

What to do now?
